

32784 to 32826—Continued.

Distribution.—A roundheaded tree found in India from the tropical slopes of the Himalayas in Kumaon eastward and southward through the hills of the Dekkan Peninsula, and from Assam to Tenasserim, and in the Malay Archipelago and the Pacific islands.

32791. BOMBAX MALABARICUM DC.

Red silk-cotton tree.

32792. BUTEA MONOSPERMA (Lam.) Taub.

"A leguminous tree with very handsome foliage and producing a great abundance of orange-scarlet blossoms. It is deciduous, grows 30 to 35 feet high, and is rather wide spreading."

32793. CALAMUS TENUIS Roxburgh.

Rattan.

"One of the rattan palms."

Distribution.—A climbing palm found on the tropical slopes of the Himalayas from Kumaon eastward and southward through Bengal, Assam, Chittagong, and Sylhet to Burma, and extending to Cochin China.

32794. CALLICARPA MACROPHYLLA Vahl.

Distribution.—A shrub with wandlike branches and white berries, found in the northern and eastern parts of India

32795. CALLISTEMON CITRINA (Curtis) Skeels.

(*Metrosideros citrina* Curtis 1794, Botanical Magazine, vol. 7, pl. 260.)

The seeds of this ornamental myrtaceous shrub from Australia were received under the name *Callistemon lanceolatum* DC. 1828 (Prodromus, vol. 3, p. 223) which was based on *Metrosideros lanceolata* J. E. Smith 1797 (Transactions of the Linnean Society, vol. 3, p. 272). Dr. Smith cited "*M. citrina*. Curt., Mag. t. 260," and remarked in part as follows: "I would never change a name that has been generally in use, whether published or not; but this is too preposterous to be retained." As the present rules of botanical nomenclature require the retaining of the first specific name applied to a species, Curtis's name is here restored.

Callistemon citrina is found along streams and near the coast of the eastern part of Australia in Queensland, New South Wales, and Victoria.

32796. CASSIA sp.

32797. CELTIS AUSTRALIS L.

"A very splendid shade tree, growing to a height of 40 feet. It has a shapely crown, and the branches are somewhat pendulous. It is said to be a rapid grower."

Distribution.—A variable tree found in southern Europe, northern Africa, and eastward in Asia to India.

32798. CINNAMOMUM CAMPHORA (L.) Nees and Eberm.

Camphor.

32799. DIOSPYROS MONTANA Roxb.

"A small, erect, deciduous tree, growing to a height of about 30 feet. Is quite ornamental and useful where small trees are desirable."

32800. DIOSPYROS PEREGRINA (Gaertn.) Guerke.

"A vigorous species growing about 30 feet high with a dense, spreading habit. The round russet-colored fruits are very attractive, but are not eaten. These make a beautiful contrast with the bright glossy-green leaves."

32801. DURANTA REPENS L.

"A shrub growing to a height of 6 or 8 feet and covered with white or lavender flowers in drooping racemes, followed by an abundance of orange-colored
